The Hatching Bottle

Obtain most any Plastic 2 liter Soda bottle. Name Brands nearly all use the same style bottles. (There are exceptions!)

With a magic marker, draw a line around the bottle, along the bottom of the label. All brands place their Label in the same place. Then remove the label. Do not use any line molded in the plastic.

With Scissors, cut 1/2" below the line, removing the bottom of the bottle. Discard the bottom piece and the original screw top.

7.5 cups of water will fill the bottle to the marker line.
