

Thank You!

There have been many types of Brine Shrimp Hatchers available, but few become long term workhorse units operating years later. Why?

From having tried many of them, a sturdy, durable, easy-to-clean option was needed. The Hatcher I envisioned would be simple, easy, and consistent to set up and tear down. It needed to be totally stable and would never tip over when bumped in a busy fishroom, and affordable, so that multiple units could be used.

After a year of discussions with Aquavista Aquatics, with their design expertise and guidance, numerous prototypes were tested to correct issues I felt affected other designs. Today I proudly offer my Perfect Batch Hatcher to you, and would love to hear your thoughts or feedback-

Thank you!
